Royal Town Planning Institute

Experienced Practitioner Assessment of Professional Competence (EP-APC)

Main Guidance

Route to Chartered membership for experienced practitioners

Published June 2019

“

This guidance is applicable to EP-APC candidates submitting their application for the first time from January 2020.

It replaces EP-APC guidance published in June 2016.

Your application will be rejected or deferred if you fail to comply with this document.

Contents

1. GENERAL INFORMATION	1
1.1 Chartered membership (MRTPI)	1
1.2 The Assessment of Professional Competence (APC)	1
1.3 What do you submit?	2
1.4 How is your application assessed?	2
1.5 Assessment outcomes	3
1.6 Resubmission and appeal	3
1.7 Tips for success	4
2. ELIGIBILITY AND EXPERIENCE	5
2.1 Who is the EP-APC for?	5
2.2 Are you eligible?	6
2.3 Does your experience qualify?	6
2.4 Calculating your relevant experience	8
3. WRITTEN SUBMISSION: PRACTICAL EXPERIENCE STATEMENT (PES)	10
3.1 What is the PES?	10
3.2 Scope and structure	10
3.3 Articulating your role	11
3.4 Avoiding common mistakes	11
3.5 Gaps in your experience	11
4. WRITTEN SUBMISSION: PROFESSIONAL COMPETENCE STATEMENT (PCS)	12
4.1 What is the PCS?	12
4.2 Scope and structure	12
C1 Professional ethics and the RTPI Code of Conduct (Core)	15
C2 Spatial planning context (Application)	17
C3 Identifying and analysing issues (Application)	18
C4 Gathering appropriate information (Application)	19
C5 Identifying and assessing alternative courses of action (Application)	20
C6 Initiating and implementing a course of action (Application)	21
C7 Legal framework (Understanding)	23
C8 Politics in planning (Understanding)	24
C9 Economics in planning (Understanding)	25
C10 Reflection and review (Core)	26

C11 Sustainability and climate change (Understanding)	27
C12 Community engagement, participation and equality (Understanding)	29
C13 Specialist knowledge and planning theory (Application)	31
4.3 Selecting case studies	33
4.4 Using case studies to demonstrate competencies	34
5. PCS ALTERNATIVE COMPETENCY: LEADERSHIP	36
5.1 Who is the leadership competency for?	36
5.2 Are you eligible to take this competency?	36
C14 Leadership in planning (Application)	37
6. WRITTEN SUBMISSION: PROFESSIONAL DEVELOPMENT PLAN (PDP)	39
6.1 What is the PDP?	39
6.2 Why is the PDP important?	39
6.3 Scope and structure	40
6.4 SWOT analysis	41
6.5 Writing goals	42
6.6 Writing objectives (sub-goals)	43
6.7 Writing an action plan	43
6.8 Sources of CPD	45
6.9 PDP checklist for success	46
7. EDUCATIONAL BACKGROUND B: PLANNING DEGREE STATEMENT (PDS) AND MATRIX	47
7.1 What is the PDS and Matrix?	47
7.2 Scope and structure	47
7.3 Criteria for assessment	48
8. EXAMPLES OF YOUR PROFESSIONAL WORK	49
8.1 What are the examples?	49
8.2 Why are the examples important?	49
8.3 Choosing your examples	49
8.4 Referring to your examples of professional work within the written submission	50

9. PRESENTING YOUR SUBMISSION	51
9.1 General presentation	51
9.2 Recommended format	51
9.3 Diagrams, illustrations and additional materials	51
9.4 Confidentiality, plagiarism and ethical considerations	52
9.5 Word limit	52
9.6 Footnotes	53
10. CORROBORATION SPONSORSHIP AND SUPPORTERS	54
10.1 The people involved	54
10.2 Mentors	55
10.3 Corroborator Declaration Form	55
10.4 Sponsor Declaration Form	56

1. General information

1.1 Chartered membership (MRTPI)

The Royal Town Planning Institute (RTPI) is the only body in the UK that confers Chartered status to planners, the highest professional qualification sought after by employers in the private and public sectors and academia. The RTPI supports its members throughout their careers, offering them a wide range of opportunities to learn, grow skills and share ideas. The MRTPI designation is recognised as a sign of competence and professionalism.

Chartered Members belong to an institute whose charitable purpose is to advance the science and art of planning for the benefit of the public, and those values are shared across the Institute's diverse membership base.

1.2 The Assessment of Professional Competence (APC)

The Assessment of Professional Competence (APC) is a competency-based process, which assesses whether you have met the high standards required for Chartered membership. It is designed to:

- raise standards of professional competence;
- empower you to drive your own professional development;
- encourage networking and participation;
- show how you manage your own learning and career direction; and
- instil a habit of lifelong learning as required by the RTPI Code of Professional Conduct.

ELEMENTS OF THE APC WRITTEN SUBMISSION

The APC application is focused on a written submission of three sections:

- 1. Practical Experience Statement (PES).** The PES is an **overview statement**, which sets out what **relevant experience** you have gained to meet the eligibility requirements.
- 2. Professional Competence Statement (PCS).** The PCS is an **analytical statement** where you use case studies to demonstrate the competencies you have developed through your experience. The competencies require you to focus not just on what you did, but also **why you did it** in a particular way and **how you went about it**.
- 3. Professional Development Plan (PDP).** The PDP is a **detailed plan**, which identifies and sets out how you are going to meet your personal professional development needs over the two years after your submission. It answers the important question: **what next?**

1.3 What do you submit?

Your application **must** consist of the following:

CORE DOCUMENTS

- **Written submission** of 7,000 words (+/- 10%) comprising three sections:
 - (1) Practical Experience Statement (PES) of approximately 1,250 words.
 - (2) Professional Competence Statement (PCS) of approximately 4,250 words.
 - (3) Professional Development Plan (PDP) of approximately 1,500 words¹.

SUPPORTING DOCUMENTS

- **5-10 examples** of your professional work.
- **Corroborator Declaration Form(s)** which cover **all** work experience in the application.
- **Sponsor Declaration Form** completed by a Chartered Town Planner.
- Scanned copies of any **relevant degree certificates, academic transcripts** or **apprenticeship completion certificate** (for educational backgrounds a, c or d²).

EDUCATIONAL BACKGROUND B CANDIDATES ONLY³

- **Planning Degree Statement (PDS) and Matrix** of up to **1,000 words**.
- **Relevant academic transcripts**.

Your contact details, education history and work experience information will also be submitted as part of your application.

Find out how to submit and relevant **submission deadlines** at: www.rtpi.org.uk/membership-submit.

If any of your documents are in a language other than English, you will need to provide a certified translation.

1.4 How is your application assessed?

When we receive your application:

1. **Pre-assessment checks are completed:** These checks ensure you have submitted all relevant documentation, are within the word limit, and meet the basic eligibility criteria. Your application may be delayed or rejected if everything is not included, or your fee has not been paid, so please ensure you also undertake the checks yourself prior to submission.

¹ The RTPI provides a template for the PDP which is compulsory to use at: www.rtpi.org.uk/ep-apc-resources. When calculating your word count, you should only count words which **you** add to the template.

² See [section 2.2](#) for an explanation of educational backgrounds.

³ See [section 2.2](#) for an explanation of educational backgrounds.

- 2. Two trained assessors receive your application:** They will consider whether you have demonstrated all the competencies and whether you have acquired the appropriate knowledge, skills and reflective practices to be elected to membership.
- 3. Assessors review your application:** They do this independently of each other and then arrange to confer and agree on a recommendation as to whether you have met the requirements.
- 4. Assessors complete a feedback report:** This details the outcome of the assessment and makes a recommendation as to whether you have demonstrated the requirements to become a Chartered Town Planner. You are formally assessed on the PES, PCS, PDP and general presentation.
- 5. Post-assessment checks are completed:** These checks review the assessors' feedback report to ensure that due process has taken place.
- 6. You are notified of the assessment outcome.**

1.5 Assessment outcomes

There are three possible assessment outcomes – successful, deferral or rejection.

- A **successful** outcome means you have demonstrated all of the requirements. If you are successful, you will be elected to the relevant membership grade. You may be referred to a PDP support phase if there were weaknesses identified in the PDP, for further details see: www.rtpi.org.uk/pdp-support-phase.
- A **deferral** means that you have not yet met some or all of the requirements. This is not a fail. You are being asked to provide additional information to demonstrate the relevant requirements.
- A submission can be **rejected**, but only if your experience, demonstrated in the PES, is short of the experience requirements by two years or more⁴. In this instance, the assessors cannot reject your application on the first attempt; they must **defer your application at least once** and give you the opportunity to clarify your experience in a resubmission. Your submission cannot be rejected solely on the PCS and / or PDP. If the PCS and / or PDP do not meet the requirements, the submission will be deferred (see above).

You will receive a feedback report with your results. The report has a summary of your results on the front page, with assessor comments on each of the three parts of the written submission separately, as well as general presentation.

1.6 Resubmission and appeal

If you have not met the requirements you will be asked to either resubmit the full section or provide a supplementary statement. Any resubmission can be made up to **two years from the date of your first submission** (resubmission fees apply). After this period you will have to submit a new application which will be assessed in its entirety by new assessors; the new application would need to comply with guidance in place at that time.

⁴ See [section 1.6](#) – you have up to two years from the date of your first submission to gain more experience.

Further details about resubmission are available at: www.rtpi.org.uk/resubmissions.
Resubmission deadlines can be found at: www.rtpi.org.uk/membership-submit.

If you feel due process has not been followed in the assessment of your application, you have a right of appeal but only after at least one resubmission attempt to address the unsuccessful elements. An appeal must be submitted in accordance with the Membership Appeal Procedure available at: www.rtpi.org.uk/membershipappealprocedure. For any queries about appeals and the process, please contact the Membership Team on +44(0)20 7929 9462.

1.7 Tips for success

- 1. Read this guidance:** this guidance is the key to your success – read it thoroughly several times, prior to preparing your submission.
- 2. Use the resources available to you:** speak to other professionals and colleagues, find a mentor, attend RTPI membership events and access online resources through the RTPI website: www.rtpi.org.uk/apc.
- 3. Competency criteria are the key:** have you sufficiently addressed each competency in your submission? The best way to meet the competency criteria is to explain the reasoning behind your decisions and actions in the case studies. A checklist is available on the RTPI website to help you.
- 4. Select your case studies carefully:** choose case studies that were challenging to you personally and which showcase your involvement. You do not have to choose the biggest, most impressive project you have worked on.
- 5. Be critical:** do not be afraid to explain how you would do things differently if you were doing a task again. Strong case studies do not need to be successful projects.
- 6. Spend time on your PDP:** a detailed plan for your future development is needed. Refer to the PDP checklist⁵ to make sure you meet all of the requirements.
- 7. Prepare:** do not leave your submission until the last minute before the deadline, and allow your mentor, manager or colleagues time to review your application.
- 8. Review your submission:** give it to someone who has never read it before – is your experience and role in the case studies clear? It is not unusual for people who are familiar with your work and your projects to read more into the text than is on the page. Remember, the assessors will only read what is presented and bring no prior knowledge of you to the process.
- 9. Check the presentation and formatting:** have you presented your submission in accordance with the details in the guidance, including the word counts? Make sure your Corroborator Form(s) are clearly labelled so the assessors can easily identify what they are looking for.
- 10. Aim for success first time:** if you produce an exemplary submission for Chartered membership you could be nominated for a commendation by your assessors. See: www.rtpi.org.uk/apc-commendations.

⁵ See [section 6.9](#) of this guidance.

2. Eligibility and experience

2.1 Who is the EP-APC for?

The EP-APC is a direct route to becoming a Chartered Town Planner for planners with extensive experience.

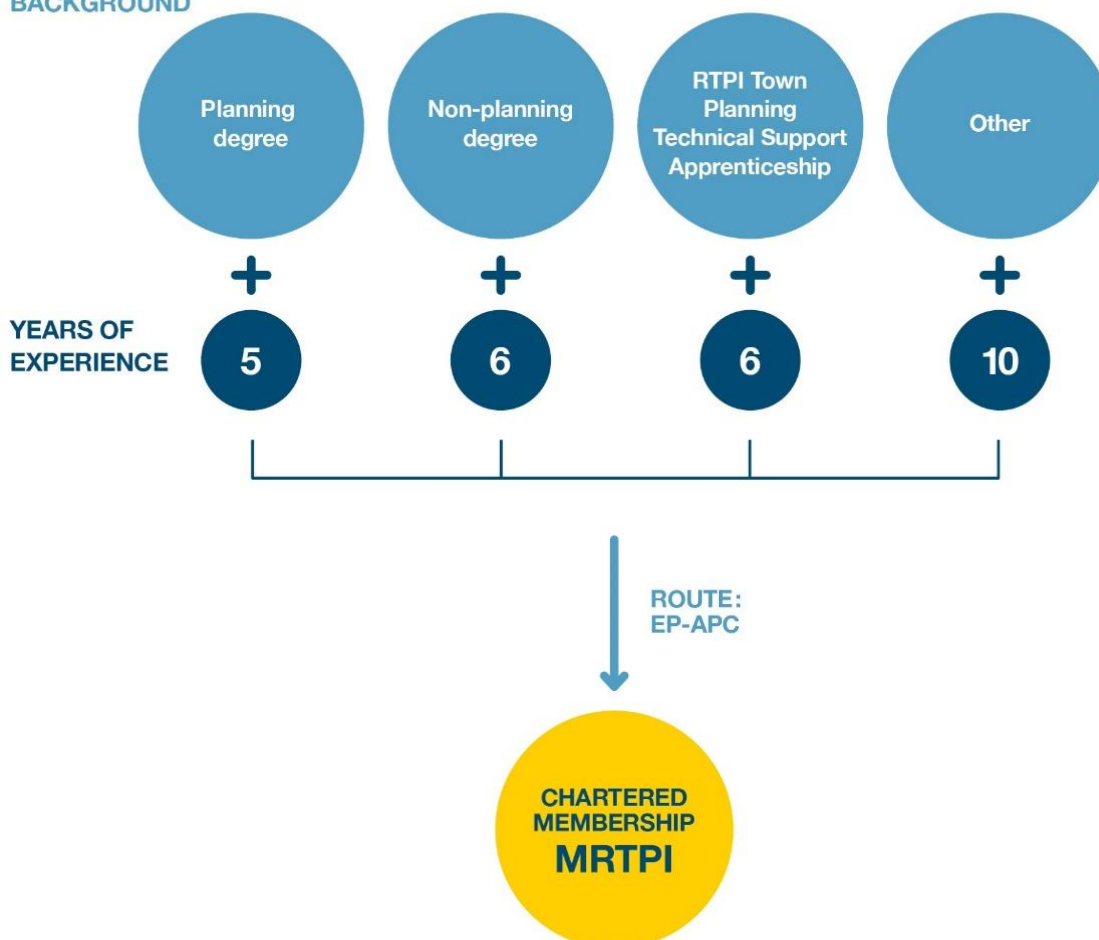

The EP-APC provides a way for experienced planners, including those who gained qualifications and experience outside the UK, to become Chartered Town Planners. Built environment professionals who have been working in and alongside planners for an extended period – such as architects and surveyors – may also be able to apply through this route.

The RTPI is keen to encourage those working in academia (teaching and / or research) to consider taking the EP-APC. This route has a range of competencies that offer more opportunities for those with academic experience to demonstrate their eligibility for Chartered membership. Guidance on using research and teaching experience in membership submissions is in the Academic Experience Advice Note available at: www.rtpi.org.uk/ep-apc.

The EP-APC also includes an optional leadership competency for those who can demonstrate significant strategic level planning experience (see [section 5](#) for further information on the optional competency).

EP-APC ROUTE TO CHARTERED MEMBERSHIP

EDUCATIONAL BACKGROUND

Are you a Licentiate, Associate or Affiliate of the RTPI?

If you are a member of another RTPI membership class, but have gained considerable planning experience, you may meet the eligibility criteria for the EP-APC (see [section 2.2](#)) and can therefore apply for Chartered membership through this route. If you apply via the EP-APC, you must meet all the criteria and competencies for this route.

2.2 Are you eligible?

To be eligible to submit your EP-APC application:

- You **must** have a minimum of **5-10 years' professional planning experience**⁶ (full-time equivalent). The exact amount required varies according to your educational background and qualification, as shown in Table 1.
- All of this experience **must** be gained **after the relevant qualification was obtained**.

TABLE 1 – EDUCATIONAL BACKGROUNDS FOR EP-APC ROUTE

Educational background	Experience required
a. Planning degree (fully or partially RTPI accredited ⁷)	5 years
b. Planning degree (non-RTPI accredited)	5 years
c. Non-planning degree	6 years
d. RTPI Town Planning Technical Support Apprenticeship	6 years
e. Other	10 years

2.3 Does your experience qualify?

The RTPI recognises the variety of backgrounds held by planning professionals. You could be working in the public or private sectors, be employed by charities or non-governmental organisations, or running your own business.

Examples of planning work that are eligible towards your application will include some of the points below. Please note that this is a non-exhaustive list of the broad types of work included as planning and candidates **do not** require experience in **all** these areas. You need to show how the work you do directly affects / influences planning decisions:

⁶ See [section 2.3](#) and [section 2.4](#) for experience requirements.

⁷ Find out if you have an RTPI accredited qualification at: www.rtpi.org.uk/accredited-qualifications.

THE PREPARATION OF PLANS, POLICIES AND RELATED DOCUMENTS

This includes but is not restricted to activities such as:

- research and analysis of information for policy formulation;
- preparation of contributory material or actual formulation and monitoring of policy, guidelines and advice;
- spatial development strategies and statutory development plans as well as master, town, village / parish settlement and conservation plans for buildings, urban areas and the countryside;
- development briefs, design guides, environmental, economic and traffic impact assessments;
- sustainability appraisal, transportation and economic assessments and travel plans;
- associated processes of economic development, viability assessments, community engagement, preparation of materials for inquiry, advocacy and presentations to clients, which are regarded as integral to plan preparation;
- landscape / biodiversity assessments and appraisals.

PLAN IMPLEMENTATION

This includes but is not restricted to activities such as:

- statutory development management / control and enforcement and the handling of appeals at all stages;
- preparation, submission and following through of planning applications and other consenting regimes;
- implementation of plans or schemes for conservation, environmental improvement, economic development, urban regeneration, traffic and transportation, tourism, minerals, waste disposal, or derelict land reclamation, including funding and delivery options;
- planning involvement in housing and housing management, community development, environmental education and recreation, and urban design;
- site appraisal, feasibility studies, scoping exercises and all forms of study preparatory to the submission of a planning application;
- water and marine planning such as flood risk planning;
- experience gained from involvement in investigation, negotiation and resolution of breaches of planning control, preparation of notices, handling of enforcement appeals and court proceedings.

MONITORING AND RESEARCH

This includes but is not restricted to activities such as:

- research and analysis of information leading to the making of planning policy or planning recommendations and decisions;
- funded research for clients from the public / private / voluntary sectors;
- monitoring of plans and policies leading to reports and plan revision;
- planning submissions, or research appraisals.

ACADEMIC PRACTICE

This includes higher education teaching experience linked with the types of activity described in paragraphs above and takes place on courses related to planning. It also includes academic research (funded and non-funded) and publication.

Relevant research undertaken towards a PhD qualification can count as relevant experience. Assessors will consider the prime purpose of the research; the stage of the research; the organisational context of the research; and how it relates to the making of planning policy and the delivery of planning outcomes.

The RTPI welcomes candidates who are engaged in teaching and/or academic research in an area of planning, and has produced a specific advice note with content shaped and reviewed by academics who have already achieved RTPI membership. It provides targeted guidance on using research and teaching experience in membership submissions. The Academic Experience Advice Note is available at: www.rtpi.org.uk/apc.

2.4 Calculating your relevant experience

The experience requirements⁸ must be gained at the relevant professional level. ‘Professional level’ is defined as exercising independent professional judgement to make decisions or influence planning outcomes.

The table below outlines the types of experience that can and cannot count towards the application.

TABLE 2 – COUNTING YOUR EXPERIENCE

Experience type	Can it count?
Full- or part-time experience. To calculate part-time experience you need to pro rata your part-time hours against the 35 hour week. ⁹	Yes
Paid or voluntary experience.	Yes
Experience gained in the UK or overseas.	Yes
Experience that is non-consecutive. Breaks in employment for parental leave, redundancy or travelling are fine. They just need to be excluded from your overall planning experience.	Yes
Experience gained whilst on a sandwich year or vacation placement. Please note that, in some cases, such work may not be of a professional level and therefore may be discounted.	Yes
Experience gained whilst self-employed. As long as you can demonstrate a consistent period of planning experience.	Yes

⁸ See [section 2.2](#).

⁹ To ensure that experience is gained over a sustained period, candidates can only claim a **maximum** of 35 hours relevant experience each week. If you work more than 35 hours a week, you **cannot** pro rata this experience to exceed the full-time requirement.

Experience type	Can it count?
Experience gained whilst studying. (See exception below.)	Yes
Experience gained whilst studying a 1-year fully RTPI accredited qualification¹⁰. For example, if you commenced this qualification on 1 September 2020, you would be able to start counting experience gained from 1 September 2021.	No
Experience gained prior to completing your educational qualification. All of your experience must be gained after completing your relevant educational qualification ¹¹ .	No
Experience less than three months in duration (full-time equivalent).	No
Administrative experience or technical support experience. Experience must be of the relevant professional level, as defined above.	No
Experience gained as an elected member or politician. You cannot count experience gained as an elected member, though such experience may help you to appreciate the context within which you operate.	No

How do you calculate part-time or partially relevant experience?

If your experience was not full-time or not fully relevant, you must demonstrate how you calculated your eligibility. For example, if you have 36 months of 28 hours a week, you would state:

- 36 months at 80% of a full-time role is equivalent to 28.8 months' full-time work.

If you worked in a role that was 40% planning and 60% non-planning for 12 months, then did six months' full-time planning, you would state:

- 12 months at 40% of a full-time role is equivalent to 4.8 months' full-time work. Plus 6 months' full-time work.

Total: 10.8 months

¹⁰ To find out more about RTPI course accreditation, see: www.rtpi.org.uk/accredited-qualifications.

¹¹ As set out in a-d in Table 1 of [section 2.2](#).

3. Written submission: Practical Experience Statement (PES)

3.1 What is the PES?

The PES is the first section of the written submission, and is an overview statement which sets out what **relevant experience** you have gained to meet the eligibility requirements. It should also provide the assessors with enough information to understand the context within which you work.

The relevant employer(s) or supervisor(s) must corroborate¹² all experience within the PES.

3.2 Scope and structure

The PES **must** refer to the planning experience you gained over the time required. It must be current up to a month prior to submission (though you do not necessarily need to be working in planning when submitting your application¹³).

You **must** demonstrate that your experience was at a suitable professional level. 'Professional level' is defined as exercising independent professional judgement to make decisions or influence planning outcomes.

It is recommended that the PES be structured in chronological order, role by role, to provide comprehensive coverage of your experience to date.

For each position you have held, the PES **must** include:

- the name and type of employer e.g. public sector, private sector, academia;
- the nature of the organisation (mainstream planning, local planning authority, multi-disciplinary practice, educational institution etc.);
- your own job description: a summary of the main role and responsibilities, including any line management responsibility;
- the nature of the work you undertook in the role; and
- dates and time periods covered.

It is also helpful to provide information on the size of the organisation and where you sit within the organisational structure, but this is not a requirement.

What if I have achieved more?

If you exceed the minimum experience requirements, you are encouraged to demonstrate this additional experience within the PES as long as it is supported by a Corroborator Declaration Form.

¹² See [section 10.3](#).

¹³ See [section 3.5](#) for how to address gaps in your experience in the PES.

3.3 Articulating your role

The PES is a factual account of your **own** professional responsibilities and an overview of your experience; it does not need to focus on competencies. Where you have been involved in group tasks or projects, you must describe how you personally contributed to the project as a whole. It is not necessarily expected that you will have been managing entire projects or been involved in a project in its entirety. Some projects you have been involved in may not have reached completion when you are finalising your submission.

You need to describe the type of planning work that you undertook. If your job has changed or evolved within a single organisation over the period of practical experience, you should clearly indicate this.

Finding it difficult to explain your experience?

Make use of bullet points, tables and / or a timeline to present your experience clearly.

If you gained some of your experience in areas that were not solely planning related, you need to estimate and clearly set out the **proportion** of your time that was devoted to planning responsibilities (see [section 2.4](#) for how to calculate relevant experience).

3.4 Avoiding common mistakes

The assessors will use this part of the submission to determine whether you have the right amount and type of experience. Assessors may disregard parts of your experience if:

- you only describe the function of your organisation or department rather than the work you have done; or
- you have described roles that are predominantly administrative or managerial and not planning; or
- they are not convinced you have gained the minimum amount of relevant experience; or
- they have difficulty identifying what part of the work outlined was done by you; or
- they feel a significant proportion of your work is more aligned to another aspect of the built environment such as surveying or architecture.

If you are concerned that your experience is not sufficiently robust to meet the minimum requirements, you may prefer to gain more experience before you submit¹⁴.

3.5 Gaps in your experience

Should you have gaps in your periods of eligible experience, for example due to extended or parental leave or a career break, which are greater than normal annual leave or sickness entitlements, these periods should be excluded from the experience period presented and not included in the calculation of experience.

You should briefly explain any gaps in your experience within your PES.

¹⁴ See [section 2](#) for experience requirements.

4. Written submission: Professional Competence Statement (PCS)

4.1 What is the PCS?

The PCS is the second section of the written submission, and is an **analytical statement** where you use case studies to reflect on competencies you have developed through your experience. Overall, you must demonstrate all competency criteria to be successful on this section.

The relevant employer(s) or supervisor(s) must corroborate¹⁵ all experience within the PCS.

4.2 Scope and structure

All planners operating at a professional level must be able to critically assess a problem, research the issues and select an appropriate response after considering a number of options. This work is undertaken in an environment complicated by multiple stakeholders with different expectations, complex legal guidelines and political objectives.

In the PCS you must demonstrate that you are a reflective professional and a competent planner. You are not only trying to show what skills you have, you are trying to show that you learn and grow in your work by thinking about the context in which you operate. You also show that you are aware of the factors that impact on your work and that you can analyse and critique your work to improve your performance.

Your PCS will be assessed against **13 competencies** which are all equally important. The competencies are interrelated and linked to one another. You are required to select **2 to 4 case studies**¹⁶ from your experience to demonstrate **all competencies** at the **appropriate level**.

EVIDENCE TYPES FOR COMPETENCIES – AWARENESS TO CORE

A minimum type of evidence is required for each competency, however, if you have experienced more in your career you are encouraged to demonstrate this.

The types of evidence range from Awareness to Core and are defined in this section. Awareness level is not required for candidates applying to Chartered membership, but the definition has been provided so that you can benchmark your experience.

The criteria for Core competencies need to be demonstrated throughout all case studies you present, unless indicated next to the specific criterion. Application, Understanding and Awareness competency criteria only need to be demonstrated in sufficient detail within one case study to be successful.

¹⁵ See [section 10.3](#).

¹⁶ For information on how to structure case studies, see [section 4.3](#) and [section 4.4](#).

1. Awareness (Recognise): Appreciate the principles of the competency recognising they have implications for your case study (not required for Chartered membership; only required for Associate membership).

- **How do I know if I have reached Awareness?** I know how planners are expected to operate in their professional capacity.... I can recognise good practice....

2. Understanding (Explain): Explain specific implications of the competency for your case study, which could be an observed or hypothetical scenario.

- **How do I know if I have reached Understanding?** I can explain how a planner should operate in their professional capacity..... I can explain what good practice looks like...

3. Application (Do): Demonstrate how you have applied the competency through your case study.

- **How do I know if I have reached Application?** I operate in a professional way in my practice..... I use my understanding of professional practice to guide my actions...

4. Core (Behave): Demonstrate repeated application of the competency through your case study and practice.

- **How do I know if I have reached Core?** I consistently behave in a professional way in my practice, in a range of situations, some of which are challenging and unpredictable... I use my knowledge and experience from similar situations to inform and guide my actions in new and unfamiliar situations...

HOW TO READ THE COMPETENCIES

Each competency is structured in three parts as follows:

- **Descriptor:** defines the competency and its relevance to the planning profession.
- **Criteria:** sets out the minimum standards you **must** meet to achieve success with the competency. Failure to demonstrate **even one criterion** means your application will be unsuccessful. There are between one and five criteria per competency.
- **Examples:** provides examples of how the competency **could** be demonstrated at the relevant Awareness, Understanding, Application or Core evidence type. The examples provided are **purely indicative** of how whole or partial criterion / criteria might be demonstrated within a competency – they are not an exhaustive list. Using these examples does not guarantee your success; you are encouraged to consider the examples within the wider context of your case studies and experience.

TABLE 3 – COMPETENCIES FOR THE EP-APC

Competency	Evidence type
C1 Professional ethics and the RTPI Code of Conduct	Core
C2 Spatial planning context	Application
C3 Identifying and analysing issues	Application
C4 Gathering appropriate information	Application
C5 Identifying and assessing alternative courses of action	Application
C6 Initiating and implementing a course of action or (for academics only) dissemination of knowledge	Application
C7 Legal framework	Understanding
C8 Politics in planning	Understanding
C9 Economics in planning	Understanding
C10 Reflection and review	Core
C11 Sustainability and climate change	Understanding
C12 Community engagement, participation and equality	Understanding
C13 Specialist knowledge and planning theory	Application

Alternative competency for leaders in planning – if you have significant strategic level planning experience you can take an alternative competency which replaces C3 - C6¹⁷.

Do not use the competencies as sub-headings

The competencies are interrelated and describe what you would do to manage an activity within the planning environment. You must therefore use case studies to demonstrate them, rather than a short example for each. The PCS should not be structured with the competencies as sub-headings.

For detailed information on each competency, see [C1 - C13](#).

¹⁷ For full details see [section 5](#).

C1 Professional ethics and the RTPI Code of Conduct (Core)

DESCRIPTOR

Members must demonstrate their commitment to the RTPI's Code of Professional Conduct¹⁸. Its five core principles relate to:

- Competence, honesty and integrity
- Independent professional judgement
- Due care and diligence
- Equality and respect
- Professional behaviour

Professionals must liaise and cooperate effectively with others and may need to use different communication methods tailored to their audience. Negotiation, mediation, influence and advocacy are also key attributes.

Ethical behaviour underpins the five core principles of the RTPI Code of Professional Conduct but it is important to recognise that ethics can go beyond the requirements of law and regulation. To build trust in the profession, it is vital to behave in an appropriate manner, to recognise right from wrong, and to be able to reflect on society's expectations of planning practice.

CRITERIA

In your PCS, **you must**:

- a. Demonstrate professional behaviour, in line with the principles outlined in the RTPI Code of Professional Conduct (**required throughout PCS**); **and**
- b. Reference a **specific clause** of the RTPI Code of Professional Conduct **and** show how you complied with it (**required once in PCS**); **and**
- c. Reflect on **how** your action has minimised reputational risk to the profession, and **why** this built trust in the profession (**required once in PCS**).

EXAMPLES OF COMPETENCY C1 AT <u>CORE</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Show how you navigated difficult professional situations and reflect on why you believe you followed an appropriate approach. Situations could include; a request to represent the council at an appeal following a refusal against your recommendation, standing by your professional judgement when under challenge, or reflecting on the approach you take when a client insists you follow a particular course of action that goes against your advice.	a, c

¹⁸ The RTPI Code of Professional Conduct is available at: www.rtpi.org.uk/professionalstandards.

EXAMPLES OF COMPETENCY C1 AT <u>CORE</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on how you dealt with a real or perceived conflict of interest and why it was or was not appropriate to continue with the task.	a, c
Consider how and why you took an informed and balanced approach in a situation which presented moral tensions.	a, c
Reflect on the steps you took to ensure sensitive information was not inappropriately disclosed and why it was important for you to act.	a, c
Evidence how you have managed pressures from stakeholders; or reflect on how you dealt with personal criticism when undertaking work.	a, c
Reflect on how you dealt with the provision of gifts by clients, consultants or other stakeholders.	a, c
Evidence your compliance with relevant employer procedures in relation to behavioural standards.	a
Show through action how you have acted professionally within your case study.	a
Explain the steps you took to guard against the abuse of elected officials' interests and reflect on why you took the relevant action.	a
Demonstrate quality customer, stakeholder or client care when faced with challenge.	a
Refer to a specific clause of the RTPI Code of Professional Conduct and explain what you did. Clauses cover areas such as; exercising independent and impartial professional judgement, conflicts of interest, disclosure, issues of discrimination, setting out fees.	b
Reflect on how you acted to help safeguard the profession or the public and the consequences if you had not taken action.	c

Top tips for this competency

#1 Criterion (b) requires reference to a **specific clause** of the RTPI Code of Professional Conduct. Your application will be deferred if you fail to do this, or do so without explaining the context and its implications i.e. how it impacted on your course of action.

#2 For criterion (c) you should consider how your actions look from the outside and whether you are acting in the public interest. Historically, acting in the public interest has been defined in terms of protecting public health, public amenity and the environment from 'harm'. Nowadays RTPI Members serve a range of interests. Acting in the public interest involves having regard to the expectations of clients, employers, the local community and politicians as well as future generations (RTPI Practice Advice: Ethics and Professional Standards, 2017).

C2 Spatial planning context (Application)

DESCRIPTOR

The work planners do will impact on other professionals, have wider spatial implications and will affect a number of stakeholders. Professional planners need to have an understanding of the broader environment in which they work and an appreciation of the frameworks within which they operate. Planners also need to understand the inter-relationships that operate across national, regional, sub-regional and local spatial scales; as well as an ability to focus on site specific issues where appropriate.

Spatial planning (i.e. managing competing uses for space and creating places valued by people) embraces regeneration, urban design, community or neighbourhood planning, transport planning, environmental planning, economic development and many more specialist planning activities.

CRITERIA

In your case study, you **must**:

- a. Set out the policy context and other relevant background information; **and**
- b. Identify stakeholders **and** show how you took into account their views or how they would be impacted by your decisions; **and**
- c. Show how you took into account broader spatial planning issues **or** differing spatial scales.

EXAMPLES OF COMPETENCY C2 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Describe the physical setting of a site in relation to its surroundings and outline the policy context.	a
Explain how community input, or specific consultee input, affected your approach.	b
Analyse the impact your decisions had for stakeholders and the local community, and how that informed your engagement with them.	b
Explain how environmental, social, economic, design or inclusive planning issues informed your approach to a project.	c
Analyse the spatial context, planning history and setting; and explain how you advised in relation to wider issues such as inequalities in health, education and access, energy policy, urban design or the rural economy.	c

C3 Identifying and analysing issues (Application)

DESCRIPTOR

A professional planner is often presented with complex projects or problems, which requires them to extract and define issues and challenges. Planners therefore need to identify and analyse issues themselves rather than under instruction from others.

CRITERIA

In your case study, you **must**:

- a. Identify **more than one** relevant issue; **and**
- b. Explain your thought process in examining these relevant issues **and** how you reflected on the implications; **and**
- c. Demonstrate your ability to reach appropriate, evidence based decisions.

EXAMPLES OF COMPETENCY C3 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain how you analysed issues to reach appropriate, evidence based decisions. This may be technical, administrative / procedural, political, legal, ethical or other factors.	a, b, c
Explain how you prioritise issues in your day-to-day practice and on what basis you assign those priorities.	a, b, c
Discuss and reach conclusions on: spatial matters (such as site constraints and planning history), engagement (such as conflict with consultees), client concerns, timescales, financial implications, political issues.	a, b, c
Explain how you personally weighed up issues or critically assessed a problem.	a, b, c

Top tips for this competency

#1 It is vital that you **explain your thinking** here and do not rely simply on a narrative of what the team or department did during a project. If you are using a team example, provide a critical analysis of how the project was undertaken, how you approached **your role** in this and what factors you personally considered.

#2 There is a common thread of analysis required for *C3 Identifying and analysing issues*, *C4 Gathering appropriate information*, *C5 Identifying and assessing alternative courses of action* and *C6 Initiating and implementing a course of action*. These competencies broadly cover the steps a planner would take to complete a project or task (analyse issues, undertake research, propose solutions and implement).

C4 Gathering appropriate information (Application)

DESCRIPTOR

The decisions a professional planner makes can have a significant impact on individuals and whole communities. To make good decisions, planners need to have the right information to hand and a robust evidence base to draw on.

CRITERIA

In your case study, you **must**:

- a. Identify **more than one** information gathering strategy; **and**
- b. Explain how **and** why you chose the particular information gathering strategies used; **and**
- c. Demonstrate how you weighed up and evaluated information **and** the impact this approach had.

EXAMPLES OF COMPETENCY C4 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Discuss challenges you faced in obtaining data and how this influenced your approach or advice and, where the information did not provide the necessary evidence, what other approaches could have been used.	a, b, c
Explain why you used particular research methods in your case study, and reflect on their value or lack of value. This could be desk or site based and include data sources such as; plans, statistics, demographics, site visits, and public consultations or desktop research.	a, b
Explain how you interrogated data authenticity and validity.	a, c

C5 Identifying and assessing alternative courses of action (Application)

DESCRIPTOR

Resolving planning issues is rarely straightforward and planners typically have to consider a range of different options and solutions based on professional analysis and experience. It is therefore important that a professional planner has the ability to reach appropriate, evidence based decisions and to appraise all options with potential viable solutions in mind. Once planners have a full understanding of a project, supported by appropriate information, they will begin to develop plans or recommendations to address the issues and to achieve the outcomes they are looking for.

CRITERIA

In your case study, you **must**:

- a. Identify **more than one** possible course of action in a planning context; **and**
- b. Explain the advantages and disadvantages of each course of action; **and**
- c. Justify why you chose a particular course of action **and** why you rejected the alternative(s).

EXAMPLES OF COMPETENCY C5 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain how you assessed a situation where planning policy had not been complied with. Outline how you identified the possible routes to achieve a resolution and then how you evaluated each alternative option before deciding on a course of action. Explain why your chosen course of action was the best option in the circumstances.	a, b, c
Discuss how you evaluated different methods of communicating an important planning issue to an applicant, colleague client or manager, and which one you chose and why.	a, b, c
Discuss how you considered different design solutions to satisfy policy criteria, explain what alternatives were discounted and why.	a, b, c
Explain how you evaluated more than one course of action, which could include; weighing up the different types of applications you could submit for a project or options to recommend refusal, approval or another solution.	a, b
Discuss the benefits and disadvantages of various draft policies or national guidance in achieving a specific planning outcome.	b

Top tip for this competency

Ideally you should choose case studies where you were responsible for the overall direction of the project. However, if this is not possible you should demonstrate how the tasks that were directly in your control contributed to the overall outcome or how you contributed to the development of the various options and their relative advantages or disadvantages and final decision.

C6 Initiating and implementing a course of action (Application)

Competency note

If you are using a case study from work experience gained as an academic, for example as a planning researcher, lecturer, teacher or equivalent, you have the choice to demonstrate alternative criteria for C6. These criteria can be found in the Academic Experience Advice Note.

DESCRIPTOR

The practice of good planning requires clear thinking, reflection on the available evidence base, determination of appropriate solutions and strong project management skills to ensure delivery. For practitioners, this includes the ability to understand and communicate the link from researching and evaluating options, to implementing solutions in a proactive and professional manner.

CRITERIA (for all applicants, excluding planning academics)

In your case study, **you must:**

- a. Show personal responsibility for implementing a project or activity, articulating why the action was necessary; **and**
- b. Demonstrate how you communicated effectively with others during implementation; **and**
- c. Explain how your involvement was critical to the delivery of a project or activity, **or** met relevant project objectives.

EXAMPLES OF COMPETENCY C6 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on how you negotiated agreements or mediated between stakeholders to progress the application / project or realise delivery.	a, b, c
Reflect on challenges, barriers or constraints to delivery within the case study and how you overcame these.	a, b, c
Explain how you engaged with other built environment professionals to seek their input and to move the project forward.	b, c
Explain a situation where you made recommendations to a client or colleague, explained the implications, and took the project forward in some way.	b, c

EXAMPLES OF COMPETENCY C6 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on the method(s) you used to keep track of activities and ensure critical paths were achieved.	b, c
Explain how you developed relationships with colleagues, applicants etc. or responded to issues arising from consultation to put ideas into practice.	b

Top tips for this competency

#1 The particular course of action or strategic direction could have been determined by senior management, politicians or a client. What we are seeking, however, is your role in actually implementing a project or activity.

#2 *C5 Identifying and assessing alternative courses of action and C6 Initiating and implementing a course of action* link closely together – you may find that one example within your case study can demonstrate both competencies.

C7 Legal framework (Understanding)

DESCRIPTOR

Planning operates in a highly regulated environment. Over time, there have been different proposals for reform to planning in different administrations within the UK and beyond. However, even when Planning Acts have been passed, it is often the case that changes happen on an incremental basis, such as when legal judgements are made by the courts and secondary legislation is made or amended. Beyond the national level, international treaties and agreements can also affect planning. A successful planner must therefore ensure they have a good understanding of the relevant legal framework which underpins planning.

CRITERIA

In your case study, **you must**:

- a. Explain how at least one decision or action taken in your work, complies with the relevant legal framework in relation to planning; **and**
- b. Explain the purpose of at least one specific aspect of the legal framework **or** legal process **and** its impact on your work.

EXAMPLES OF COMPETENCY C7 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain how relevant legislation informed the planning advice or recommendations given within the case study.	a, b
Reflect on how a planning solution was delivered to meet statutory and regulatory requirements in your case study.	a, b
Reflect on the impact of compliance and non-compliance with specific aspects of the legal framework within your case study.	a, b
Evidence an ability to translate legal requirements and interpret their implications competently, including any changes that need to be made as a result.	a, b
Reflect on the implications of recent interpretations of the legal framework such as legal judgements handed down by the courts or decisions received at appeal.	b

Top tips for this competency

#1 It is not sufficient to simply state the title of a relevant Act or other statute in your submission. To demonstrate this competency your understanding behind the legislation must be apparent.

#2 It is important to recognise the distinction between the legal framework and planning policy when addressing this competency.

C8 Politics in planning (Understanding)

DESCRIPTOR

The planning process and planning decisions often come under scrutiny, nationally and locally in the UK and abroad, on account of the level and range of impact and what it can achieve. New jobs, additional housing, or an alternative use for a plot of land whose openness is valued by members of a community are examples of this.

Whilst professional planners apply technical skills to inform judgements, ultimately, they have to balance a range of conflicting demands in the use of land, including differences between varying public opinions and the political influence that this brings. Consequently, any practitioner involved in planning should see the need for a clear and ongoing appreciation of the political system in which planning operates and the potential for politics to influence different outcomes.

CRITERIA

In your case study, **you must:**

- a. Explain how the political system you operate in, influences a planning process **or** planning outcome; **and**
- b. Reflect on why the political system has implications for your work.

EXAMPLES OF COMPETENCY C8 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain the political nature of the area of planning in which you work and how this affected, or could have affected, the case study.	a, b
Discuss a situation where local concerns or reservations were weighed up, perhaps contrary to wider national or regional policy.	a, b
Explain how you might adapt an argument to suit a particular political audience within your case study.	a, b
Discuss why engagement with elected officials may be necessary in the case study.	a
Discuss why elected officials may have overturned planners' recommendations in your case study.	b

Top tip for this competency

This competency is not simply about engaging with elected officials. While it is not always possible to anticipate the role that politics plays in the planning process, you should show an ability to learn from, and adapt to, such situations.

C9 Economics in planning (Understanding)

DESCRIPTOR

In order to deliver social and environmental objectives, the 21st century planner needs to understand the economic context of planning decisions. Professional planners need to recognise the range of ways in which they can add value to development activity and other planning decisions. Planners thus use their knowledge of how markets operate, including the economics and financing of development, to ensure that development adds value by being economically sustainable.

The financial implications for public, private and other sectors thus need to be taken into account to avoid raising local expectations or forming unachievable planning strategies; and to maximise the value from investments whilst balancing this against wider sustainability objectives. This is not the same as always being 'pro-development' or prioritising development interests. The ultimate aim should be to generate added value for the whole community by looking at the long term contribution of planning options as well as at their immediate impacts.

CRITERION

In your case study, **you must:**

- a. Reflect on how a planning outcome influences economic factors **or** how economic factors impact on a planning outcome.

EXAMPLES OF COMPETENCY C9 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on the impact of economics for planning, such as how density or design requirements affect the viability of a development scheme, or the implications of specific infrastructure being required up-front.	a
Discuss the economic consequences of a potential planning decision or development proposal within the case study.	a
Explain how different planning approaches can affect affordability, deliverability and / or viability within a case study.	a
Explain the economic implications relating to a small scale extension such as; assessing the cost benefit for an applicant or the implications of requiring more expensive design materials on small scale proposals.	a
Explain how economics were taken into consideration when preparing planning policy.	a
Discuss the economic implications of delays in obtaining planning permission.	a
Explain the benefits and disadvantages of a specific economic investment in relation to social and / or environmental issues.	a

Top tip for this competency

This competency is about economics *within* the planning process – not service or budget cuts within the planning profession.

C10 Reflection and review (Core)

DESCRIPTOR

Reflective practice is a distinguishing feature of a professional and is defined as “the capacity to reflect on action so as to engage in a process of continuous learning”¹⁹. A process of reflection and review ensures that professionals evaluate their work outcomes, are aware of how their work can be affected by external changes; and use that reflection to influence the success of future practice. It also means taking a critical look at your own learning as well as performance. The RTPI requires members to regularly reflect on learning through the Code of Professional Conduct and its continuing professional development (CPD) requirements.

CRITERIA

In your PCS, **you must**:

- a. Reflect on what you did well and how you could improve your performance (**required throughout PCS**); **and**
- b. Analyse how your performance impacted on your subsequent practice, or how you would do things differently in the future (**required throughout PCS**); **and**
- c. Identify your areas for professional development of knowledge **and / or** skills based on your prior performance (**required throughout PCS**).

EXAMPLES OF COMPETENCY C10 AT <u>CORE</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Consistent reflection on areas for improvement in relation to procedures you adopted such as; recognising that there were other strategies or information, which could have been used to achieve a better planning outcome.	a, c
Consistent reflection on your areas for development such as; the need to develop your stakeholder management skills, improve your knowledge of specific policies, increase your understanding of project management following challenges that arose during the course of your project.	b, c
Consistent reflection on how your approach in a case study was affected by your previous experience.	b

Top tips for this competency

#1 To demonstrate this competency, you need to explain not just the ‘what’ of the example (i.e. your actions) but the ‘**so what?**’ (i.e. what happened / did not happen as a result of your action / inaction) and also the ‘**now what?**’ (i.e. what you learnt from this situation and its outcome and how you will act differently in the future because of it).

#2 Any weaknesses in your skills or knowledge highlighted in the PCS will need to be drawn through to the PDP.

¹⁹ Schon, D., (1983). The Reflective Practitioner. Basic Books: New York.

C11 Sustainability and climate change (Understanding)

DESCRIPTOR

Sustainability seeks to balance economic, environmental and social dimensions and planners need to understand and take into account all three. Planning plays a key role in promoting social and economic development, while conserving environmental, social, cultural or heritage assets for future generations.

Planners need to understand the implications of climate change for places on a global scale, and how planning is critical in responding to these challenges (such as the climate hazards an area may face, and their social and economic costs and consequences). Better mitigation and adaptation to climate change is essential for a sustainable economy and society, and planning has a crucial role to play in securing this, including responding to any potential opportunities of a changing climate.

CRITERIA

In your case study, **you must:**

- a. Reflect on how the economic, social and environmental dimensions of sustainability were balanced to achieve a suitable planning outcome; **and**
- b. Reflect on the challenge(s) climate change presents and how you can address them locally.

EXAMPLES OF COMPETENCY C11 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain the role of planning in achieving sustainability, not just in terms of the environmental aspects of building design but also the social ones, such as lifetime design, inclusive planning, accessibility and meeting the different needs of the community.	a
Reflect on the impact that planning policy and / or practice has played in relation to local socio-cultural factors such as; influencing the location / distribution of schools, hospitals, theatres, entertainment venues; managing the location of fast food outlets; facilitating access to new technologies as part of new developments; ensuring place making / new developments take account of the needs of minority groups.	a
Explain how local planning policies have been drafted to play a role in reducing the need to travel (particularly by private car) and / or in ensuring a high proportion of trips are made using sustainable transport modes (which could include public transport, walking and / or cycling).	b
Explain how getting a site in the right place and using the inherent qualities of the site can help achieve sustainability (e.g. drainage, passive solar).	b

EXAMPLES OF COMPETENCY C11 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on how infrastructure planning can address climate change (for example through renewable energy production, energy and transport networks, flood defence, water and waste).	b
Explain how planners have considered climate change mitigation and / or adaptation in the case study.	b

Top tip for this competency

C11 Sustainability and climate change requires you to focus on broader sustainability issues, and how these are balanced against one another, whereas *C9 Economics in planning* requires you to demonstrate understanding of economics in planning.

C12 Community engagement, participation and equality (Understanding)

DESCRIPTOR

Community engagement and participation are integral aspects of good planning. When carried out successfully they can reduce conflict, result in better development and, most importantly, allow people and communities to have an influence over the shape of the places where they live. They are also crucial to ensure that planning respects equality and diversity in decision making.

Given people's different lives and backgrounds, identifying and making effective contact with a wide range of individuals and organisations can be challenging. But for planners, capturing the views of as many people as possible, in proportion to the scale of a development or policy proposal, is critical if balanced and informed decisions are to be made. Gaining a balanced and inclusive view is the only way to ensure that a representative voice is heard, one on which good decisions can be taken.

Reaching out to those who do not normally engage or who have difficulty in doing so requires more thought and preparation, but is vital if a balanced response is to be secured. Understanding the need to be inclusive, informing people of how their views have been taken into consideration and why certain decisions were made, and developing an approach which seeks to address the variety of reasons why people do not engage, is the key to success.

CRITERIA

In your case study, you **must**:

- a. Demonstrate how planning decisions affect different groups **and** how this can be taken into account in the planning process; **and**
- b. Identify obstacles or challenges that make it difficult for people to engage in the planning process, **and** how planners can overcome these; **and**
- c. Reflect on the different tools and techniques that can be used to support effective engagement and participation.

EXAMPLES OF COMPETENCY C12 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on an example of enabling, improving and promoting access and respecting diversity of cultures, views and ideologies.	a, b, c
Show your understanding of the potential for planning to have different outcomes for different social groups, whether defined by age, gender, disability, religion or race; and the need to analyse decisions and recommendations, assess how they may affect different groups and make judgements about the impacts you anticipate (This is sometimes referred to as "equality-proofing").	a, b

EXAMPLES OF COMPETENCY C12 AT <u>UNDERSTANDING</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain ways in which you can promote equality and equality of opportunity in the planning process.	a
Explain why community engagement and participation are important in the planning process, in the context of your case study.	b
Explain why it is important to go beyond simple consultation – and what techniques you might use to widen responses.	c

Top tip for this competency

You are required to reflect on wider community engagement in *C12 Community engagement, participation and equality*. There is a difference between engaging with stakeholders (for example, applicants, statutory bodies, landowners) and with other interested parties (for example, local communities), who may be reluctant to engage with the planning system and need encouragement to participate.

C13 Specialist knowledge and planning theory (Application)

DESCRIPTOR

Planners need to have in-depth technical knowledge of their area of practice. Specialist knowledge is an area of work, rather than a discrete planning process or series of tasks. A specialist area of operation should not be seen as something that is too narrow or restrictive. Specialisms could include (but are not restricted to):

- coastal / marine planning
- commercial development
- community or neighbourhood planning
- development management / control
- economic development
- environmental planning
- housing planning
- infrastructure planning
- international development
- minerals and waste planning
- planning enforcement
- planning law
- planning policy
- regeneration
- residential development
- transport planning
- urban design

Planners also need to have an appreciation of why they do what they do. An understanding of the theory that underpins professional practice is therefore vital. Planning theories can be divided into two broad categories:

- theories of planning, also known as paradigm theories (why planning exists and what it does); and
- theories in planning, also known as close-to-practice level theories (prescribed methodologies for how to do planning, or how to go about it)²⁰.

Background reading may be required for this competency. See also the RTPI's Planning Theory Advice Note.

CRITERIA

In your case study, you **must**:

- a. Show in depth technical knowledge of one area of planning practice; **and**
- b. Explain the relationship between your specialist area of operation and spatial planning in a wider sense; **and**
- c. Identify and reflect on the implications a planning theory has for your area of specialism.

²⁰ Kristian Olesen (2018) Teaching planning theory as planner roles in urban planning education, Higher Education Pedagogies, 3:1, 23-39, DOI: 10.1080/23752696.2018.1425098; and António Ferreira, Olivier Sykes & Peter Batey (2009) Planning Theory or Planning Theories? The Hydra Model and its Implications for Planning Education, Journal for Education in the Built Environment, 4:2, 29-54, DOI: 10.11120/jebe.2009.04020029

EXAMPLES OF COMPETENCY C13 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Explain how your specialism intersects with the principal areas of planning practice and show how you have used this knowledge when drafting a report or publication.	a, b
Demonstrate how and why you advised clients, colleagues, applicants or stakeholders, on technical matters relating to one area of planning, such as by explaining the key considerations which apply when assessing a particular land use proposal.	a
Reflect on a theory of planning such as; Synoptic planning, Incremental planning, Transactive planning, Advocacy planning or Communicative / Collaborative planning models. Consider how your knowledge of this theory informed the way you proceeded, citing relevant text(s).	c
Reflect on a theory in planning such as; Garden Cities movement or Orthodox Urbanism and how this has impacted your method or decision, citing relevant texts.	c

Top tips for this competency

#1 You should select just **one** specialist area to demonstrate this competency. If you have specialised in more than one area in your career, you should select the specialism which can best demonstrate other competencies as well.

#2 Discussion of legal principles, case law or development of policies, in and of themselves, is not sufficient to demonstrate the planning theory criteria of this competency. The RTPI provides a Planning Theory Advice Note which identifies suitable areas for discussion. Background reading and / or research may be required for this competency and you are encouraged to cite relevant texts.

4.3 Selecting case studies

WHAT IS A CASE STUDY?

A case study is an example of work which you have been a part of – it must allow you to drill down into the details of your practice. A case study will therefore focus on a **specific** application, proposal, scheme, policy document, research report or project. If the project was of a large scale, you may wish to focus on **one aspect, stage or phase** of the project as your case study.

Selecting an area of work or a process e.g. ‘appeals’, ‘planning applications’ or ‘research programme’ is usually too broad. Instead, you are advised to focus on a specific appeal, application or piece of research.

What if the project is unfinished?

You can use a project that is unfinished or undetermined as your case study if you feel it best demonstrates the competencies. Within the case study, let your assessors know what stage the project has progressed to.

IDENTIFYING CASE STUDIES

The PCS is not simply an extended PES. When selecting a case study you should:

- Think of a case where you were **personally challenged**. It is easier to show reflective thinking when something went wrong. For example, when the application was not approved or not as you anticipated, where design proposals were not accepted during consultation or your research / proposals for mitigation were not considered sufficient. The assessors are not judging you on the outcome of the case study but on your discussion of it.
- Consider **work examples** which can be included with your submission to support your PCS.
- Determine how you will **divide the section word limit**. In some projects, you may have had a major role in researching and monitoring and in another you may have dealt extensively with other professionals or with a complex group of stakeholders. Alternatively, you may have been involved in one project which demonstrates all the competencies.

Think about confidentiality

You should ensure your submission only refers to information in the public domain and does not breach professional or commercial confidentiality. Your submission should not refer to individuals by name or make references which could make individuals easily identifiable.

4.4 Using case studies to demonstrate competencies

HOW TO STRUCTURE A CASE STUDY

One way to structure a case study is to include the following elements:

- problem definition – briefly describe the issue and provide enough background to provide the assessors with the context of the situation;
- the challenges and issues that arose and how you considered and addressed them; and
- a conclusion which summarises what you learned from the experience and how it relates to the competencies.

The RTPI also provides an indicative outline to help you structure your case study see: www.rtpi.org.uk/ep-apc.

WRITING STYLE FOR CASE STUDIES

To demonstrate the competencies, it is important that you explain how you used your professional judgement in your case study to demonstrate your personal contribution. You should not expect the assessors to presume anything from the tasks you describe in your PCS. Consider your decision making process and how you approached the task in question. The PCS is not only about what you did, but about also why and how you achieved it.

You should therefore use language that shows your contribution such as:

- “I contributed to this by...”
- “I was responsible for...”
- “this project helped me to understand...”
- “the tensions resulted in the need for me to...”
- “this was a challenge for me because...”
- “as a result of changing circumstances, I...”
- “I did this because...”
- “I did this in order to...”

Please note that the use of language such as “we decided...” or “the project team agreed...” or “the decision agreed in the meeting was...” **does not** demonstrate your own role.

Analyse and evidence – what, why, how?

The PCS is about not only what you did, but also **why you did it** in a particular way and **how you went about it**. The main error you could make in this section is to be too descriptive and not sufficiently analytical and reflective.

WRITING STYLE FOR CASE STUDIES – EXAMPLES

Poor examples	Improved examples
<p>“I communicated effectively with all stakeholders and secured their agreement for the proposal.”</p> 	<p>“I decided to communicate X to the stakeholders through Z method, as this would ensure A. This ultimately secured their agreement for the proposal.”</p>
<p>“We implemented the strategy by doing X, Y and Z. I then revised the plans to achieve B.”</p> 	<p>“I was responsible for implementing X, Y and Z elements of the strategy. To do this, I prepared a timetable for A and circulated it to B to ensure X.”</p>
<p>“I worked with expert X to understand how Y construction methods would deliver Z outcome.”</p> 	<p>“Expert X explained Y, I therefore concluded that Z construction method would deliver B outcome.”</p>
<p>“Throughout this project I demonstrated due care and diligence in accordance with the RTPI Code of Professional Conduct.”</p> 	<p>“When the costs of the project escalated, I revised the fee proposal and sent it to the client in accordance with clause X of the RTPI Code of Professional Conduct (due care and diligence); the client confirmed their agreement.”</p>

Use your examples of professional work

While your case studies should be self-sufficient and self-explanatory, you should also cross-reference your case studies to the relevant examples of professional work, for example by using footnotes, see [section 8](#). This provides the assessors with more information should they wish to clarify something in your case study. There should be strong linkage between all the elements of the submission.

5. PCS alternative competency: Leadership

5.1 Who is the leadership competency for?

The RTPI welcomes candidates who have significant strategic level experience to demonstrate their competence in planning leadership. The EP-APC route therefore includes an alternative competency, **C14 Leadership in planning** which may be taken instead of standard competencies, C3 to C6.

C3, C4, C5 and C6 test the ability to identify and analyse issues, gather information, identify and evaluate action, and initiate and implement action. These are important, particularly for those in the early stages of their professional careers, but may be less directly relevant to those with greater experience who are using these skills at a strategic level in senior roles.

Competency exemption

By undertaking this leadership in planning competency, you are exempt from demonstrating, within the PCS, C3, C4, C5 and C6 (listed in [section 4](#)).

5.2 Are you eligible to take this competency?

To be eligible for this competency:

- You **must** meet the experience requirements²¹ for the EP-APC.
- You **must** demonstrate that this experience includes **at least 5 years' experience at a strategic level** as defined below.
- You **must** demonstrate this experience **within the PES**, clearly identifying which parts of your experience are at strategic level.

“Strategic” level experience is defined as:

- having a high-level overview of the entire organisation, its vision and objectives;
- determining long-term (working in timeframes of 3 years or longer) or overall aims and interests and the means of achieving them;
- being responsible for long-term complex and strategic problem solving; and
- leading and integrating the planning function at a very high level in the context of the whole organisation.

It is not about having a specific job title or role, or something obtained automatically after having spent a certain amount of time working in planning.

Is this competency right for you?

If you are not sure whether your experience makes you eligible to take this alternative Leadership in planning competency, you are advised to take the standard EP-APC route and competencies C1 - C13 or contact the RTPI Membership Team to discuss your experience and eligibility.

²¹ See [section 2](#) for experience requirements.

C14 Leadership in planning (Application)

Competency note

This optional competency is aimed at candidates taking the EP-APC who have significant strategic level experience. It is offered as an option in recognition that with the development of your career, your work might leave you distanced from the detail covered by competencies *C3 Identifying and analysing issues*, *C4 Gathering appropriate information*, *C5 Identifying and assessing alternative courses of action* and *C6 Initiating and implementing a course of action*.

Please see [section 5.1](#) and [section 5.2](#) for advice on whether you are eligible to take this competency.

If you are not sure whether your experience makes you eligible to take this optional Leadership in planning competency as an alternative to C3 - C6, please contact the RTPI to discuss your circumstances.

DESCRIPTOR

Being a successful leader in the planning profession is about showing accomplishment in a chosen field and being able to bring others together to create and deliver a strategic vision. Leadership is not about having a specific job title or role, but is gained through achievements and a demonstrable ability to motivate and inspire others.

CRITERIA

In your case study, you **must**:

- a. Show how you have contributed to the delivery of planning at a strategic level through your advice and actions; **and**
- b. Show leadership when faced with difficult planning issues; **and**
- c. Demonstrate how your advice, achievements or actions motivated other professionals to achieve shared objectives; **and**
- d. Demonstrate at what point your planning leadership was critical to the success of the issue at hand.

EXAMPLES OF COMPETENCY C14 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Demonstrate leadership through publication and application of your original research, through leading the discipline and inspiring others through your ideas, or by leading your nation in a new direction in terms of planning.	a, b, c, d

EXAMPLES OF COMPETENCY C14 AT <u>APPLICATION</u> EVIDENCE TYPE	COULD DEMONSTRATE CRITERIA
Reflect on how you developed new and creative solutions to existing and / or emerging strategic issues and challenges in your area of planning, and how these have contributed to the welfare, economy and / or environment of a community.	a, b, d
Explain how you developed, delivered and implemented wide-reaching and long-term planning strategy locally, regionally, nationally and/or internationally.	a, b, d
Reflect on how you use your leadership skills to achieve corporate goals and how you influence the strategic direction of your organisation and decisions with planning implications.	a, d
Explain how you demonstrated leadership in the context of client work for example by motivating others to make changes to culture or processes to achieve improved planning outcomes.	c
Reflect on how you have mentored, motivated and supported other planners and associated planning professionals to enable them to develop their own careers within the planning profession.	c
If you work as a sole practitioner, you may explain how you mentored students, graduates or early career planners, or planners in other organisations or how you influenced those in related professions.	c
If working in a teaching and research environment, you could show leadership not just to students within your own institution but through collaborative working with other academics.	c

Top tip for this competency

To demonstrate this competency, you need to show leadership specifically in terms of planning rather than generic management skills that could apply to any profession.

6. Written submission: Professional Development Plan (PDP)

6.1 What is the PDP?

The PDP is the third section of the written submission; it is a **detailed plan** which sets out how you are going to meet your professional development needs in the two years after your submission. It answers the important question: **what next?** You are required to maintain a PDP as part of your membership and the assessors are looking to see that you understand this process.

6.2 Why is the PDP important?

All members entering the profession are required to begin a habit of lifelong learning and continuing professional development (CPD). Qualifying to enter a profession does not mean that you remain competent to practice for the rest of your life. All professions change, requiring all practitioners to continue to learn, debate, discuss and update skills or knowledge on an ongoing basis.

The PDP represents the planning stage of the CPD cycle²².

The RTPI Code of Professional Conduct states that members must:

- a) at least once a year prepare a PDP for the next two years identifying their personal professional development needs;
- b) in any two year period undertake a minimum of 50 hours' CPD activity related to the undertaking or managing of planning; and
- c) maintain a written record of their CPD activity.

It is a requirement to continue the reflective practice of preparing a PDP throughout your membership and the assessors are looking to see that you understand this process.

Please note that every year the RTPI carries out an audit of PDP and CPD records from a randomly selected sample of its membership. For more information on CPD monitoring please visit the RTPI website: www.rtpi.org.uk/cpd.

²² See [section 6.8](#) for a list of types of CPD.

6.3 Scope and structure

The PDP consists of:

- **SWOT (Strengths, Weaknesses, Opportunities, Threats) analysis:** The SWOT analyses your current personal strengths and weaknesses as well as the opportunities and threats that could impact on your ability to meet your career goals. It should clearly link to the PES and / or PCS, and inform your approach to the goal, objectives and actions.
- **Goal(s):** A goal should be a high-level strategic statement of what you want to achieve. Each goal should be clearly set in the context of furthering your planning skills and knowledge. It should specify the end result i.e. what you will be able to do or be as a professional in two years' time, as a result of carrying out your plan. You must identify **one or two goals within your PDP**.
- **Objectives:** The objectives are sub-goals that narrow down and identify the developmental areas of knowledge and skills you will need to gain to achieve your goal. They are therefore a way of breaking down your longer term goals so that you can begin to work towards or prepare for it. You must identify **two to four objectives for each goal**.
- **Action plan:** The actions are the specific details of the CPD activities you will carry out to gain the skills and knowledge needed to meet your objectives. They need to include what you will do, where, when, why and how, what you will gain from it and how you will measure that development (meeting the SMART model²³). You must draft **two to four SMART actions for each objective**.

The RTPI provides a **compulsory template** for the PDP that reflects this structure. When writing your PDP you should use the PDP checklist²⁴. Additional PDP resources are also available at: www.rtpi.org.uk/pdpresources.

Your PDP is not inflexible and should not prevent you from taking advantage of (and recording) valuable but unexpected CPD opportunities. However, it does allow you to plan your professional development in a structured way and evaluate all your CPD activities against carefully identified needs.

Personal or business development?

Your PDP must focus on your own personal professional development – what are **you** getting out of the plan? Your PDP is likely to be unsuccessful if it benefits an employer, business or organisation but does not clearly benefit or develop you. For example, whilst developing networking skills might be an appropriate objective, growing your professional network is not.

²³ See [section 6.7](#).

²⁴ See [section 6.9](#).

6.4 SWOT analysis

Your SWOT analysis is presented in a grid so that you can easily assess your current circumstances.

EXAMPLE SWOT ANALYSIS

<p>Strengths For strengths, you might include:</p> <ul style="list-style-type: none"> • areas of strong planning knowledge and understanding • strong transferable skills and competencies, such as communication skills <p>Be confident about what you are good at – use your strengths to inform your goal.</p>	<p>Weaknesses For weaknesses, you might include:</p> <ul style="list-style-type: none"> • areas of weakness in planning knowledge and understanding • underdeveloped transferable skills and competencies, such as presentation skills • understanding that there is more to planning than your current experience <p>Your weaknesses should be used to inform the goals, objectives and actions for your plan. You are expected to address the majority of the weaknesses you have identified.</p>
<p>Opportunities For opportunities, you might include:</p> <ul style="list-style-type: none"> • opportunities within the industry • opportunities within your organisation • training and professional development opportunities • support of RTPI (Nations and Regions, Networks etc.) • opportunities to volunteer <p>Consider what opportunities can be integrated into your goal.</p>	<p>Threats For threats, you might include:</p> <ul style="list-style-type: none"> • industry downturns • negative changes within the organisation e.g. downsizing or restructuring • better qualified competitors • limited training opportunities <p>What threats could affect your ability to meet your goals?</p>

Watch out for weaknesses

There should be a clear link between your “weaknesses” and the goals, objectives and actions identified. The majority should be based around planning knowledge, skills or experience.

You do not need to list more than five weaknesses (at least three are required). Your PES and PCS should support and help to explain which weaknesses you are taking forward and why.

6.5 Writing goals

You must identify **one or two goals within your PDP**.

For a goal, you might like to think about:

- where you would like to be working (perhaps in terms of organisation, sector or even country);
- the nature of the work you would like to be doing (e.g. types of spatial planning role or specialism);
- what challenges will you face at work;
- the level you would like to be working at; and / or
- any gaps in your knowledge or skills or any emerging trends that you need to be aware of (bear in mind that this would need to be strategic enough so it can be broken down further in the latter parts of the plan).

Goals can be career aspirations, like developing a specialism, moving sector or gaining a promotion, as long as the planning context is clearly explained and the associated objectives are focused on furthering skills and knowledge.

Be aware that a goal such as 'to obtain a promotion' is, by itself, too broad. Instead, identify what type and level of work you will be doing.

EXAMPLE GOAL: I will be working as a senior planner within Organisation X dealing with large-scale residential planning applications with minimum support.

Keep your goal focused and strategic

Your goal does not need to include a lengthy explanation – one or two sentences will do. Consider the question: as a professional planner, where do you want to be in two years? You should take time to carefully consider your goals, as a reliance on vague or generalised statements will result in the PDP being deferred.

Goals that should generally be **avoided** include:

- 'To become a Chartered / Associate / Legal Associate Member'. This goal is not very meaningful. The whole process leads up to this, and once an application is submitted it is essentially out of your control. It also provides no indication as to how you would like to develop professionally in terms of knowledge and skills.
- 'To progress my career'. This goal is too vague to be meaningful. With this kind of goal you should consider what direction your progress will take, in what time frame, or indeed what you mean by 'progress'?
- 'To gain a promotion'. This goal is, in itself, too vague and would need to be broken down to explain the planning context. What type of promotion are you aiming for? What specific knowledge and skills will you need to gain, to be in such a role? This should lead to the setting of other, shorter-term objectives focussed on CPD activity."

6.6 Writing objectives (sub-goals)

You must identify **two to four objectives for each goal**.

Objectives can be:

- focused on a specific area of knowledge or skill, relating to the goal;
- shorter-term than your goal, and are likely to be addressed in the next 6-18 months.

They do not have to be SMART²⁵ or measureable.

Improvements in professional skills such as negotiation, presentation or management are acceptable objectives as long as these are within the context of your planning career aspirations and the overarching goal(s).

EXAMPLE OBJECTIVE: Develop my presentation skills.

Need help identifying your development areas?

The RTPI provides a Core CPD Framework, developed with input from members, employers and the wider profession, which highlights the skills and knowledge areas members need to meet the planning challenges of today and the future, see: www.rtpi.org.uk/cpdframework.

6.7 Writing an action plan

You must draft **two to four SMART actions for each objective**.

Your Actions **must** meet the SMART model:

Specific: identify the specific CPD activity²⁶ to be undertaken e.g. what reading, research, work-based learning or training course will you do?.

Measureable: identify your learning objectives and consider key performance indicators, or ways in which to consolidate your learning.

Achievable: show you have funding, approval, time off to undertake the activity. If you cannot show that the action is achievable, you need to have a back-up plan in place.

Relevant: to you in your work setting and objective.

Time-based: specify the dates the action will begin and end – all actions need to take place within the plan period.

Activities and tasks do not need to be sequential. You can carry out two or more activities concurrently. While your PDP is a two-year plan, the majority of actions can take place within the first year of the plan, if appropriate.

²⁵ See [section 6.7](#) for a definition of the SMART model.

²⁶ See [section 6.8](#) for acceptable forms of CPD.

A good action plan should be detailed enough for someone else to implement. It should answer questions such as:

- What will be done?
- How will it be done?
- Who will do it?
- When will it happen?
- Do you need senior colleague or line manager approval?
- Is there a budget for this training?
- Do you have permission to work shadow someone?
- Does it impact on your existing role?

The PDP template has columns to help you to ensure your action plan is SMART.

EXAMPLE ACTIONS

Action	How will you measure your learning?	Start date and end date
<p>(Specific, Achievable and Relevant to an objective on environmental regulations within planning)</p> <p>Agreed with my manager to give a presentation on changes to environmental regulations within planning at our staff CPD event.</p>	<p>(Measureable)</p> <p>Feedback forms will show that my colleagues understood and learnt from the session.</p>	<p>(Time-based)</p> <p>14 July 2020</p>
<p>I will review the following free resources on environmental regulations within planning:</p> <ul style="list-style-type: none"> • XXXX • XXXX • XXXX 	<p>I will note down my learning and incorporate them into future projects on X and Y.</p>	<p>April – August 2021</p>

Action	How will you measure your learning?	Start date and end date
<p>(Specific, Achievable and Relevant to an objective on leadership skills)</p> <p>Attend XXX Leadership Skills course. This will be self-funded and completed in my own time as I am a sole practitioner.</p>	<p>(Measureable)</p> <p>My increased confidence in speaking with be noted by clients and stakeholders at relevant meetings.</p>	<p>(Time-based)</p> <p>5 November 2020</p>
<p>I will mentor a junior planner to improve my coaching and leadership skills. If no junior planner is available to mentor, my back-up plan is to read X book on leadership.</p>	<p>I will seek feedback from the junior planner to determine how I have performed and how I could improve my mentoring.</p>	<p>December 2020 – April 2021, fortnightly meetings</p>

6.8 Sources of CPD

The RTPI accepts an extensive range of activities as appropriate CPD, which can be free or very low cost. This means you have a great opportunity to select activities that are appropriate to your needs. Some examples of valid development activities include:

- online learning modules;
- attending planning inquiries or hearings;
- formal events such as conferences, seminars or workshops;
- short courses;
- formal qualifications;
- structured targeted reading on a particular topic e.g. journals, online, policy papers;
- volunteering;
- work-shadowing or placement;
- mentoring or coaching;
- supervised academic research;
- preparation of materials for training courses, technical meetings or the technical press;
- involvement in a professional group;
- secondments;
- project work (beyond your day-to-day work);
- involvement in RTPI Nation or Region, chapter or network.

See also: www.rtpi.org.uk/cpdframework.

What actions are appropriate for a PDP?

Your Action Plan should **only** contain activities that are developmental for you e.g. reading or research, work shadowing, attending courses, work-based learning etc.

Actions that focus on doing your day job, applying for jobs or achieving professional membership are not usually developmental and should be avoided. Work based learning is acceptable, but you must highlight what you will learn from it (e.g. how taking on a new area of work will develop specific knowledge and skills).

Business development activity is also unlikely to form a SMART action, unless it is clearly linked to a personal development objective.

6.9 PDP checklist for success

Your PDP will be assessed against the following checklist:

- Your PDP must be on the template prescribed by the RTPI and available on the RTPI website: www.rtpi.org.uk/apc
- Your **SWOT links** to your PES and / or PCS (either partially or in its entirety).
- Your Action Plan addresses the **majority of weaknesses** identified in the SWOT.
- You have identified **one or two goals**.
- For **each goal** identified, you have **two to four objectives** which focus on skills and knowledge.
- For **each objective** identified, you have **two to four SMART actions**²⁷.
- Your PDP focuses on at least 50% planning related skills or knowledge. It is acceptable for other professional skills to make up the remainder of the plan.
- Your PDP covers the two-year period **after** the date of your submission. For example, if you submitted in January 2020 your PDP would run from January 2020 to January 2022.
- Your PDP is within the word limit for the written submission (guide of 1,500 words)²⁸.

These points must be met for the PDP to be successful.

Does the PDP need to be corroborated?

You are not required to have your PDP corroborated although you should indicate that you have the relevant support for any actions which require it (e.g. budget in place for attendance on a training course).

²⁷ See [section 6.7](#) for an explanation of the SMART model.

²⁸ The word count for the PDP **only** includes the text you enter into the template.

7. Educational background b: Planning Degree Statement (PDS) and Matrix

7.1 What is the PDS and Matrix?

If you are applying for membership with a non-RTPI accredited planning degree (educational background b), you benefit from being required to demonstrate the same number of years as candidates with an RTPI accredited degree (educational background a). Educational background b candidates therefore need to prepare an additional statement and matrix to demonstrate that their degree contained sufficient planning content.

See [section 2](#) for an explanation of educational backgrounds.

Should you apply under educational background b or c?

If you studied a non-RTPI accredited planning degree but are unable to demonstrate the PDS and Matrix requirements, you should apply under educational background c (with an additional year's experience).

If you meet the experience requirements for **both** educational backgrounds b and c you can apply under either educational background.

7.2 Scope and structure

If you wish to apply based on educational background b you must provide the following:

- a full degree transcript;
- a Planning Degree Statement (PDS) explaining how your degree covered six broad principles that govern planning operations²⁹:
 - Social science as an analytical framework
 - The interplay between land use and transportation
 - Design and the realisation of place
 - Economic issues relating to development
 - Environmental challenges
 - Legal and institutional frameworks
- a Matrix mapping the six principles above against each module title within the degree.

The RTPI provides a **compulsory** template for the PDS and Matrix. The PDS and Matrix **together** must not exceed 1,000 words (excluding any words which already form part of the template).

If your degree covered a specific aspect or area of planning (such as urban design, regeneration) you will need to show how it relates to the topics listed above.

²⁹ Taken from the RTPI's Policy Statement on Initial Planning Education.

7.3 Criteria for assessment

The PDS and Matrix **must** evidence that a minimum of 75% of the modules studied in your degree was spent on the six broad principles outlined in the section above. Not all principles need to be addressed in equal weight.

You only need to discuss the degree that is relevant to your application. Alternatively, you can use two degrees if you can demonstrate that 75% of the total modules studied **across both degrees** was spent on the six broad principles. A module is defined as a class, unit or subject which is undertaken as part of a degree or course.

You need to briefly explain the value and relevance of course content studied, including any major projects, assignments or exams. You do not need to reflect on learning outcomes from your degree.

8. Examples of your professional work

8.1 What are the examples?

The examples are written documents which you have prepared during the course of your practice. You must submit **5-10 examples** of your professional work with your application.

8.2 Why are the examples important?

While these are not formally assessed, the examples of your professional work support your written submission. Your examples must be listed in your application form and the RTPI can request further information on any examples if required.

The examples of professional work will be used as reference points for the rest of your submission (particularly the PCS) and are an opportunity to demonstrate how your experience and the work you do makes you eligible for Chartered membership.

The examples are important because:

- **Selecting them requires you to critically reflect on your work.** Choosing the most relevant examples from your professional experience will help you reflect on the work that you have undertaken and on the way in which this has contributed to the development of your professional competence.
- **They will help the assessors see the professional behind the text.** The examples may be used by the assessors to gain more information about the work you have done and the case studies you reference.

8.3 Choosing your examples

The RTPI recognises that for reasons of confidentiality it may sometimes be necessary to anonymise or redact sensitive information from examples.

The types of examples that are welcomed include:

- Written work such as reports, planning applications or statements
- Academic work such as dissertations, PhD extracts or research
- Published journal articles
- Presentations, transcripts of webinars or podcasts you have delivered
- Minutes of meetings
- Emails and other correspondence with clients and other third parties where advice or direction is given (rather than routine email correspondence)

The types of examples that should not be submitted include:

- Descriptions of course modules or degree study³⁰
- Entire books or very long academic submissions such as PhDs
- Promotional material such as annual reports or brochures
- Project or development briefs you have responded to
- References or descriptions of your work provided by other people³¹
- Standalone maps, drawings or diagrams
- Videos, recordings etc.

The examples are stand-alone and are excluded from the word limit. Where documents are lengthy, you are strongly advised to keep the examples focused by directing the assessors to the particularly relevant sections, using page and paragraph referencing, or highlighting, or submitting relevant extracts.

You must include documents in the evidence section that are directly referenced in your submission. Do not include examples of all the work you have undertaken.

8.4 Referring to your examples of professional work within the written submission

You should refer to your examples of professional work to emphasise, clarify or elaborate upon an area of experience, however you must fully demonstrate the competencies in your submission. The examples should provide background information only – the key information and / or argument showing how you satisfy the relevant competency must be fully contained in the submission (e.g. in the PCS) itself.

When referring to your examples, clearly indicate where the assessor can find the reference, for example, by using footnotes.

³⁰ This is required for candidates applying on the basis of having a non-accredited planning degree, but is not an example of professional work.

³¹ These are not needed because you have already had your submission corroborated.

9. Presenting your submission

9.1 General presentation

The submission is a demonstration of your professionalism and a reflection of the standard of your work. Your application will therefore also be assessed on its presentation and may be deferred if it:

- contains spelling mistakes;
- uses incorrect grammar and punctuation;
- is poorly laid out and / or not professionally presented.

In addition to the above, for your application to pass the RTPI's validation checks, the submission **must**; be in English, be within the word limit, the PES and PCS must have page and paragraph numbers and the PDP template must be used.

This is a professional qualification and submissions that include inappropriate information, or breach confidentiality, are likely to be unsuccessful.

9.2 Recommended format

The following format for the submission is recommended:

- word processed in Arial 11pt font;
- double spaced for easier reading and assessment;
- your membership or contact reference number is on each page;
- referencing, where required, should be to the Harvard style (i.e. author, date).

Details on how to submit your application can be found online at: www.rtpi.org.uk/membership-submit.

Do not forget to proof read

Build time into your application preparation to ask someone to read your submission. It may help to ask a non-planner to read your submission to see if they can understand what you do.

9.3 Diagrams, illustrations and additional materials

You are permitted to include illustrations in your written submission, though this is not a requirement. It is unlikely that more than two illustrations would be needed in the main body of the submission (this does not include any illustrations that may appear in the examples of professional work).

Assessors will base their decision on the work described and reflected upon within your written submission and will not take into account opinions of a third party (appraisals, references, performance reports etc.).

9.4 Confidentiality, plagiarism and ethical considerations

Your submission should be written in the spirit of the RTPI Code of Professional Conduct. This means that you need to:

- maintain professional confidentiality (for example, when referring to material that may be considered professionally sensitive you may wish to anonymise names and locations);
- avoid specifically naming colleagues or other professionals, regardless of whether this is in a positive or negative light;
- ensure the submission is entirely your own work and appropriately reference other sources of material (if applicable).

If that proves to be difficult, please contact the RTPI Membership Team to seek advice.

The RTPI will investigate all suspected instances of plagiarism by candidates and take disciplinary action if necessary; and you may be asked to adhere to administration procedures which seek to address plagiarism.

Your submission is confidential

All submissions are treated as confidential and our assessors are bound by a confidentiality agreement.

9.5 Word limit

The word limit for submissions³² is 7,000 words +/-10% (i.e. 6,300 – 7,700 words). The submission itself is indicative of your research, analysis and report writing skills. The examples of professional work are excluded from the word limit.

The submission should be divided, approximately, in the following proportions:

PES – 1,250 words
PCS – 4,250 words
PDP³³ – 1,500 words

You must include a word count at the end of each section of the submission.

Exceeding the word limit will result in delay and possible rejection of your submission.

³² See [section 7](#) for the word limit for the PDS and Matrix (educational background b candidates only).

³³ The RTPI provides a template for the PDP which is compulsory to use. When calculating your word count, you should only count words which **you** add to the template.

9.6 Footnotes

Footnotes must only be used for cross referencing (e.g. within your submission or to other documents) or explaining abbreviations. Footnotes are not included in the word limit.

Excessive use of footnotes, or using footnotes to include additional information, and therefore increasing your word count, will result in you being asked to review your submission. Competencies or experience demonstrated only or predominantly in footnotes will not be deemed successful.

10. Corroboration sponsorship and supporters

10.1 The people involved

Many people will assist you in the membership application process. The roles these people will play are explained below.

THESE PEOPLE GET INVOLVED...

EARLY ON

Mentor: Critical friend who will help you throughout the process. Having a mentor is not compulsory. They can, however, be a useful tool and resource. Mentors can provide you with career advice, planning related advice and specific advice on competencies.

PRE
SUBMISSION

Corroborator(s): Employer or supervisor who has first-hand experience of your work and confirms the accuracy of your claims. You must get all the work experience in your application corroborated.

Sponsor: RTPI Chartered Member who countersigns your application declaring that they consider you a professional who reflects the values of the Institute.

ON OR AFTER
APPLICATION

Assessors: Trained and fully qualified RTPI members who assess your application. Assessors work in pairs and come from a range of different backgrounds and sectors. For details on how our assessors are trained and operate, see: www.rtpi.org.uk/assessors.

The RTPI Membership Team are also available to support you from beginning to end. They can advise on queries about the process and regularly publish resources to assist you; they also deliver RTPI membership events. After you have submitted your application, the Membership Team will complete relevant validation checks and can help if you are required to resubmit your application or are considering an appeal.

Can one person be my corroborator, sponsor and mentor?

Your corroborator, sponsor and mentor could all be the same person if they can fulfil each of the roles defined above. They must complete the relevant form for each role.

10.2 Mentors

Mentors are not compulsory, and may fulfil a different role for those practitioners who have extensive experience. A mentor can help you get the most from the application process, provide you with additional support and help you with reflection. The RTPI therefore encourages all candidates to consider working with a mentor.

THE MENTOR'S ROLE

Mentors can fulfil a variety of different roles: a coach, a counsellor, a facilitator of networking opportunities, or simply a sounding board. However, mentors will generally:

- make themselves available to provide advice and support you either face-to-face, by email or over the phone;
- attend meetings with you at mutually agreed times;
- offer advice in setting specific and measurable objectives;
- offer guidance on the production of a PDP;
- offer advice, where appropriate, on the final written submission;
- guide you towards becoming more critically reflective of your own practice and progress; and
- give you support and advice on professional matters.

Confidentiality is central to the mentoring process and open discussions will strengthen the relationship and lead to better outcomes. It is not the role of the mentor to lead the application process, which will always be your responsibility.

FINDING A MENTOR

If you feel that you would benefit from having a mentor, it is your responsibility to find one as this is part of your professional development. Your mentor does not have to be a Chartered Town Planner, however, they do need to understand the RTPI membership application process (i.e. read this guidance). Your mentor could be someone you know already from your own professional networks; other avenues for finding a mentor include networking through RTPI networks or at RTPI regional or national events.

Current assessors are not able to act as mentors, nor comment on specific applications, though they can give general advice on the application process and principles.

The RTPI provides a Mentoring Advice Note to assist mentors.

10.3 Corroborator Declaration Form

Your application **must** be accompanied by completed Corroborator Declaration Form(s), which are available on the RTPI website. Corroboration is a vital part of the application as it ensures the integrity of all submissions.

WHO CAN CORROBORATE?

The Corroborator Declaration Form must be completed by your supervisor(s) or employer(s). You cannot have your application corroborated by subordinates. Corroborators need to read your application (excluding the PDP) and confirm the accuracy of your claims. They therefore must have first-hand experience of your work. Your corroborators do not have to be members of the RTPI.

You should maintain relations with previous employers when you change jobs. This will make it easier to obtain corroboration at a later stage, when you have finalised your application.

CORROBORATOR DECLARATION FORM REQUIREMENTS

Your corroborator **must** provide the following information in the Corroborator Declaration Form:

- your name;
- your role within the organisation;
- your relationship to the corroborator;
- start and end dates of the corroborated time period³⁴;
- details on the work you have undertaken during the corroboration period; and
- confirm that the corroborator has read the relevant parts of your application and that they agree with your claims.

How many Corroborator Declaration Forms do I need?

The number of Corroborator Declaration Forms you submit will be dependent on your work history. **All experience in your application must be supported by a Corroborator Declaration Form.** If you are unable to obtain corroboration for a certain time period, please see our Corroborating Your Submission Advice Note.

Self-employed applicants must have the Corroborator Declaration Form completed by clients or other professionals who have direct knowledge of their work.

For further details on corroboration, see the Corroborating Your Submission Advice Note.

10.4 Sponsor Declaration Form

Your application **must** also be accompanied by a completed Sponsor Declaration Form, signed by a current Chartered Member of the RTPI. The Form is available on the RTPI website. Your sponsor must declare that they have read and support your application and that they consider you a professional who reflects the values of the RTPI.

You must have known your sponsor in a professional capacity for a minimum of six months.

³⁴ If the corroborator is unable to verify the entire period of employment in a role, additional corroboration will be required.
